

ISK Americas S/4HANA Public Cloud Implementation

Solution

- Implemented SAP S/4HANA Public Cloud (MTE) to leverage cutting-edge technology.
- Deployed modules including (FI), (SD), (PP-PI), (MM), and (QM).
- Utilized SAP Best Practices tailored for Chemicals and Process Manufacturing to optimize operations.
- Integrated SAC for advanced analytics and enhanced data visualization capabilities.

Challenges

- Handling complex hazardous material reporting requirements.
- Streamlining inter-company subcontracting and reconciliations.
- Migrating quality control and manufacturing recipe data.
- Tackling limitations of an end-of-life legacy system.
- Improving remote data access from an on-premise infrastructure.

Key Benefits

- Created a strategic platform for quarterly innovation and adaptability.
- Centralized SAP to standardize global business processes and reporting.
- Streamlined intercompany reconciliation for better consolidation.
- Offered real-time financial oversight across international entities.
- Accelerated supplier invoice uploads for operational efficiency.
- Automated material costing for a quick start to the fiscal year.
